

# Continuing Professional Development

GC is proud to offer a series of continuing professional development hands on programmes. These programmes are designed to relate to your daily practice and enhance your role in providing exceptional patient care.

## Class IV made easy

### Program

The use of composite restorative materials has been an inevitable part of everyday practice. Most commonly, patients demand a fast, good and an inexpensive restoration. Techniques have been developed which enable clinicians to accomplish the art of creating accurate and visually pleasing restorations with the use of composites. These materials can help you attain superior aesthetics and long-lasting restorations.

#### In this workshop, you will learn:

- How to do a class IV cavity restoration in simple and achievable steps
- Tips and tricks on how to do layering in an efficient workflow
- To maximize the potential of your composite material and see natural tooth aesthetics can be created easily in a shorter time.
- Easy to follow finishing and polishing techniques

### YOUR TRAINER

#### RL Halili-Castillo

RL obtained her degree in Doctor of Dental Medicine at the University of the East Manila Philippines. She has acquired extensive clinical experience in her own dental practice, where she was able to hone her management and clinical skills, providing a comprehensive range of dental services to her patients. She has also practiced at the Health Promotion Board School Dental Services of Singapore, giving emphasis on oral health care programs for school children. She joined GC Australasia as a Professional Development Manager armed with over eighteen years of experience in dental. She is actively involved in training and education programs specialized in fibre technology, aesthetic and restorative dentistry across the region.
